### **EXAMINER'S AMENDMENT**

1. The examiner includes the examiner's amendment with the notice of allowance because a new updated claim set wasn't submitted with the RCE.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Daniel Nesbitt on June 3, 2009.

The application has been amended as follows:

Cancel Claims 1-8, 22, 24-27, 29, 31-35, 38-50.

Claim 28:

A self-contained, automatically-sequencing device for painless, inter-muscular injection of a liquid medicament, comprising:

- a) a housing having a base for attachment to the skin of a patient,
- b) an injection needle disposed within the housing, the needle having an outside diameter less than about 0.38 mm, an inlet end and an opposed injection end, and being configured for movement between a first position wherein the injection end is within the housing and a second position wherein the injection end extends the base to a distance sufficient for intramuscular insertion thereof,

Art Unit: 3763

- c) a reservoir containing a liquid medicament,
- d) a means for liquid communication between the reservoir and the injection needle,
- e) a means for inserting the injection needle to its second position,
- f) a means for pumping the medicament from the reservoir to the injection end of the needle, wherein the pumping means pumps the medicament at a substantially constant volumetric flow rate of from about 0.5  $\mu$ L/s to about 20  $\mu$ L/s,
- g) a means for retracting the injection needle from its second position to a third position within the housing, and
- h) a means for automatically sequencing and activating the inserting means, the pumping means and the retracting means.

Claim 54:

A device according to claim 2829, further comprising a means for attaching the base of the self-contained device for semi-permanent attachment to the skin of the patient, the attaching means being configured wherein during the pumping step, a person is not required to hold the device.

### ***Election/Restrictions***

3. The claims are in condition for allowance and the restriction requirement, as set forth in the Office action mailed on 07/26/2006, has been reconsidered in view of the

Art Unit: 3763

allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.**

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

#### ***Reasons for Allowance***

4. The following is an examiner's statement of reasons for allowance:

The subject matter of the independent claims could either not be found or was not suggested in the prior art of record. The subject matter not found was an injection device that is intended for a painless inter-muscular injection that has a housing, a needle with a specific diameter to help with flow rate and reduced trauma, a reservoir, a means for liquid communication, a means for inserting the needle into the patient, and a means for pumping a medicament from the reservoir at a constant volumetric flow rate that is from 0.5  $\mu\text{L/s}$  to about 20  $\mu\text{L/s}$ . The flow rate helps to provide a painless injection because of the rate in which the medicament is injected into the patient and at the constant volume during the injection.

Art Unit: 3763

The examiner also has invoked 112 6<sup>th</sup> paragraph for the means for language.

The independent claims also include other patentable subject matter in combination with the other elements or steps of the claim not mention in the above paragraph.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MATTHEW F. DESANTO whose telephone number is (571)272-4957. The examiner can normally be reached on Monday-Friday 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nick LUCCHESI can be reached on (571) 272-4977. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
